

Damper POJC

POJCs

POJcN

POJcR

DESCRIPTION:

Manually operated POJC type dampers are delivered in versions allowing the installation of an electric actuator. They are produced in three versions:

POJCs - hermetic, with rubber sealing along the perimeter of adjusting flap, used when it is necessary to fully cut off air flow.

POJcN - no adjusting flap sealing, used to control flow in pipe laterals.

POJcR - adjusting damper, makes it impossible to fully cut off air stream flow, used to control output - for example in expansion boxes or air inlets.

Gasket on connection stub.

SYMBOL: POJC... - Ød / u / mat. / reg.

Type _____
POJCs
POJcN
POJcR
 Diameter d [mm] _____
 Gasket _____
No gasket - no marking
 Material _____
Zinc coated sheet - no marking
1.4301 stainless steel (according to the PN-EN 10088)
Aluminium 5754 (according to the PN-EN 573)
 Rodzaj regulacji _____
rr - manual control
rs - actuator control
