The Ventmann Frameless CIRCLE vent diffusers is a highly versatile solution for every room type and interior design style. Its stylistic dexterity and ability to blend in perfectly with the environment make it our most popular model.

Like all Ventmann vent diffusers, every version of the CIRCLE model can be plastered together with the wall or the ceiling, and the same paint can be applied. This enables a new level of elegance and seamless integration for our ventilation systems.

Our standard CIRCLE model is available with a variety of connection nozzle sizes:

- the smallest connection nozzle diameters available are 100mm or 125mm.
- the mid-sized option for connection nozzle diameter is 160mm.
- and the largest connection nozzle diameters available are 200mm or 250mm.

The diffuser cap is supported by our new Click system. This system makes it even easier to put the cap in place correctly. It is also more environmentally friendly and has a higher operational temperature range than the magnets previously used.

These beautiful, sleek diffusers create a stunning effect, especially when multiple units are installed in a single room.

To see for yourself, and learn more about how these diffusers are installed, you can watch our product showcase video using the QR code below.

You can also find all of the technical information on our CIRCLE vent diffusers in our catalogue.

Ventmann – your choice of air elegance.
