

# Corotop Oplot

Multi-functional mat in the form of a braid

Three-dimensional multifunctional mat in the form of a braid, consisting of individual polypropylene fibres intertwined in a pointed form. It acts as a separation and drainage layer. It provides air circulation and the ability to drain water and moisture from the metal roofing or façade.

## Advantages

- ✓ lightweight and comfortable to install
- ✓ suppresses the noise of precipitation
- ✓ protects the initial roofing

## Application

- ✓ for ventilated, insulated, uninsulated, and boarded pitched roofs
- ✓ or metal covers made of standing seam
- ✓ in ventilated and non-ventilated metal façades

## Characteristics

Material	polypropylene	Thickness at 2 kPa	7,5 mm
Mass per unit area	250 g/m <sup>2</sup> ±8 %	Reaction on fire	class E
Colour	black	Tensile strength, along/ across	50 / 25 N/50mm
Width	1,4 m	Elongation, along/across	70 / 40 %
Length	30 m	Temperature resistance	-20° C to 80 °C

## Packaging

Rolls/square meter per pallet (rol/m <sup>2</sup> ):	9/ 378
Pallet dimension: length × width × height (m):	1,20 x 0,80 x 1,60

## Storage

The rolls should be stored in ventilated, free from moisture place. Protect from chemical detergents and high temperatures The rolls must be transported in covered means of transport, protected from damage.
