

Platon Floor

Moisture protection for floors on concrete

Description :

Specially developed plate for vapour diffusion resistance and ventilation of substrates in floors and walls. Dimples with good load-bearing capacity and sound attenuation. The plates have dimples with damping for comfort when moving on the floor. The plates have air gaps with a system for ventilating any moisture or emissions. Complete system for solving moisture problems in concrete structures.

Application :

Platon Floor is a moisture- and vapour-impervious surface for establishing healthy indoor environments. The air layer under the plate provides ventilation of concrete, basements, floors and walls with a high moisture content.

Storage :

Store upright and protected from UV

Installation :

The plates are cut to size using a knife or scissors. See separate installation instructions for the product

Fore more details see laying instruction on our website.
