

Chimney Platform

Chimney platform for safe access to the chimney

Description :

A chimney platform is used as a work platform to provide safe access to the chimney. Provides access and prevents damage to roofing sheets during sweeping.

Application :

Application range: pitches from 18° to 50°. Can also be used with Top Bench to increase the height (23 cm)

Installation :

Follow the installation instructions in the package. As a safety device, the product should be inspected annually, or before use, for any damage/defects. Screws must be retightened and any damaged or defective parts replaced.

Storage :

Store in a dry place and protected from UV

Fore more details see laying instruction on our website.
