

# Platon Ventitex

Platon Ventitex as an acoustic damper for use on concrete.

## Description :

Platon Ventitex consists of a polypropylene net. It is loosely woven and is therefore completely diffusion-open. Platon Ventitex can withstand attacks from the most common chemicals.

## Application :

Platon Ventitex is laid as a base for Platon Floors, to dampen any rattling of the plastic sheets against concrete. The product is laid on the concrete floor and finished approx. 10 cm from the wall.

## Storage :

Temperate, dry and shielded from UV

## Installation :

Installed with 5 cm overlap.

Fore more details see laying instruction on our website.

## Accessories for :

Platon Gulv

## Approvals and guarantee

# Platon Ventitex
