Structures and joints

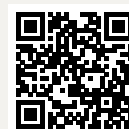

Together with the amazing looks of the decors, the surface texture and joint pattern create a harmonious overall experience. While the joint pattern creates the characteristic profile of the floor, the textured embossing makes the material of the decor, such as wood, stone or concrete very realistic and authentic.

Plank formats

Our collection is available in many different plank formats, from 3-strip and wide plank, to herringbone, chateau planks and more!

Underlays

Parador floors can be optimally installed for any application: our underlays even-out small bumps and at the same time provide high compressive strength. With an integrated moisture barrier, the right product ensures the necessary moisture protection in case of mineral substrates.

Cleaning, maintenance and repair

Skirting boards

Parador offers a wide range of matching skirtings for a harmonious look to any flooring product. Alternatively, the colours stainless steel, white and black or a primed surface for customised painting, give the opportunity to create a unique look. Parador skirtings are easy to fit with clip technology (optional adhesive in adhesive groove). Our choice of caps complete the range to perfection.

Profiles

Parador profiles combine, bridge and create finishes for perfect flooring aesthetics. As transition profiles, they connect floor coverings of the same height and expansion joints. Adapting profiles are used for the transition between different high floor coverings. End profiles create clean borders with tiles, door sills and French windows. Perfect flooring harmony is achieved with the 3-in-1 HDF-profile that is identical to the flooring in terms of decor and texture, which can be universally used for every purpose.
