IDENTITY (As Used on Label and List) Lithium ion battery equipment	Note: Blank spaces are not permitted if any item is not applicable or no information is available, the space must be marked to indicate that.		
Section 1- Identification			
Manufacturer's Name GP Battery Marketing (HK) Ltd.	Emergency Telephone Number Within USA and Canada: 1-800-424-9300 Outside USA and Canada:+1 703-527-3887		
Address (Number, Street, City State, and ZIP Code) 7/F, Building 16W, 16 Science Park West Avenue, Hong Kong Science Park, New Territories, Hong Kong	Telephone Number for information +852-24843333		
	Date of prepared and revision 4 Mar 2022 Signature of Prepare (optional)		

### Section 2 - Hazards Identification

GHS Classification:

N.A.

= ···- =				
Section 3 – Composition/Information On Ingredients				
Hazardous Components:				
Description:	CAS Number	Approximate % of total weight		
Lithium Cobaltite (LiCoO2)	12190-7-3	20-40Wt%		
Graphite	7782-42-5	10-30WT%		

 Graphite
 7/82-42-5
 10-30W 1%

 Lithium salt
 21324-40-3
 1-3 WT%

 Poly (vinylidene diflouride) PVdF)
 24937-79-9
 0-5 WT%

#### Section 4 - First Aid Measures

First Aid Procedures

If electrolyte leakage occurs and makes contact with skin, wash with plenty of water immediately.

If electrolyte comes into contact with eyes, wash with copious amounts of water for fifteen (15) minutes, and contact a physician.

If electrolyte vapors are inhaled, provide fresh air and seek medical attention if respiratory irritation develops. Ventilate the contaminated area.

Document Number: PPB100L Revision:26 Page 2 of 9

Section 5 – Fire-Fighting Measures					
Flash Point (Method Used)	Ignition Temp.	Flammable Limits	LEL	UEL	
N.A.	N.A.	N.A.	N.A.	N.A.	

**Extinguishing Media** 

Carbon Dioxide, Dry Chemical or Foam extinguishers

Special Fire Fighting Procedures

Protective equipment: Wear self-contained respirator. Wear fully protective impervious suit. Cool exterior of batteries if exposed to fire to prevent rupture.

Unusual Fire and Explosion Hazards

Do not dispose of battery in fire - may explode.

Do not short-circuit battery - may cause burns.

Battery may burst and release hazardous decomposition products when exposed to a fire situation. Lithium ion batteries contain flammable electrolyte that may vent, ignite and produce sparks when subjected to high temperature (>150°C), when damaged or abused (e.g. mechanical damage or electrical overcharging); may burn rapidly with flare-burning effect; may ignite other batteries in clothes proximity.

Document Number: PPB100L Revision:26 Page 3 of 9

#### Section 6 - Accidental Release Measures

Steps to Be Taken in Case Material is Released or Spilled

Batteries inside that are leakage should be handled with rubber gloves.

Avoid direct contact with electrolyte. Remove personnel from area until fumes dissipate. If the skin has come into contact with the electrolyte, it should be washed thoroughly with water.

Wear protective clothing and a positive pressure Self-Contained Breathing Apparatus (SCBA).

Sand or earth should be used to absorb any exuded material. Seal leaking battery and contaminated absorbent material in plastic bag and dispose of as Special Waste in accordance with local regulations.

#### Section 7 - Handling and Storage

Safe handling and storage advice

Batteries should be handled and stored carefully to avoid short circuits.

Do not store in disorderly fashion, or allow metal objects to be mixed with stored batteries.

Never disassemble a battery.

Do not breathe cell vapors or touch internal material with bare hands.

The cells and batteries shall not be stored in high temperature. Keep cells between -20°C and 35°C for prolong storage. When the cells are closed to fully charged, the storage temperature should be between -20°C and 30°C and should be controlled at 10-20°C during transportation and packed with efficient air ventilation. Otherwise the cells maybe leakage and can result in shortened service life.

a) In general, all batteries in all forms of transportation (ground, air, or ocean) must be packaged in a safe and responsible manner. Regulatory concerns from all agencies for safe packaging require that batteries be packaged in a manner that prevents short circuits and be contained in "strong outer packaging" that prevents spillage of contents. All original packaging for GP Lithium ion Powerbank (referred to as "Lithium ion battery") has been designed to be compliant with these regulatory concerns.

Rechargeable Lithium ion Powerbank(UN 3480), are forbidden for transportation aboard passenger-carrying aircraft. Such batteries transported in accordance with Section IA, IB & II of Packing Instruction 965 must be labeled with the CARGO AIRCRAFT ONLY label. Lithium ion cells and batteries must be offered for transport at a state of charge (SoC) not exceeding 30% of their rated design capacity.

### Material Safety Data Sheet for GP Lithium ion Portable PowerBank (Lithium ion Battery (including lithium ion polymer batteries))

Document Number: PPB100L Revision:26 Page 6 of 9

b) International Maritime Organization (IMO) IMDG Code regulated these products as UN 3480, Lithium ion batteries, Class 9 dangerous goods with Special Provision 188 and Packing Instruction 903 assigned.

The watt-hour of the models can be referred to the appendix (Model list).

Transport of <u>Lithium ion batteries contained in equipment</u> or <u>Lithium ion batteries packed with equipment</u> have to follow the appropriate regulations for UN3481.

### Section 15 - Regulatory Information

Special requirement be according to the local regulations.

#### Section 16 - Other Information

The data in this Material Safety Data Sheet relates only to the specific material designated herein. However, the data is provided without any warranty; expressed or implied, regarding its correctness or accuracy. It is the user's responsibility to assume liability on loss, injury, damage, or expense resulting from improper use of this product. We urge you to make this information available as appropriate in your organization and to any others with whom you arrange to handle this product.
