

Treskrue WAF

Bruksområde

ESSVE Treskrue WAF med 1 fiberskjær i spissen og TX bitsfeste er tilpasset de fleste monteringer i tre, sponplater, kryssfinér, mm innendørs og utendørs.

Beskrivelse

Treskrue WAF er produsert i herdet stål med Silver CorrSeal C4 klassifisert overflatebehandling for utendørs og innendørs bruk. Skruen har stor diameter hvilket gir høy klemkraft ved monteringen. Hodet bygger lite i høyden, noe som kan være en fordel for monteringen. Den har 1 fiberskjær i spissen, noe som gir lavt innskruingsmoment i tremate-

rialet samt reduserer risikoen for sprekkannelser.

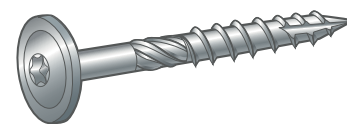

Skruer som er lengre enn 70 mm har en ekstra fresegjenge rett etter den vanlige tregjengen. Dette for å forenkle monteringen av lengre og grovere skruer.

Skruhodets underside er utformet slik at skruen passer korrekt ved monteringen i bjelker og stolpesko.

ESSVE Treskrue WAF er CE-merket i hht EN 14592. Skruen har TX bitsfeste.

Montering

Anbefalt turtall: 1100 - 2500/min.

Tre

Tekniske data

Materiale	Herdet stål SAE C10B21
Overflatebehandling	Silver CorrSeal
Korrosivitetsklasse	C4
Bruddgrenseverdi, fuk	Min. 500 Mpa
Strekkgrenseverdi, fuk	Min. 350 - 400 Mpa

Treskrue WAF med stort hode
