

All our wallpapers currently have to comply with the actual AgBB regulations in Germany (committee for the health assessment of building materials). The limits set in it are the strictest in Europe. All our product groups are tested annually and voluntarily at the Fraunhofer Institute WKI in Braunschweig to monitor compliance with the limit values. Attached a current measurement protocol that confirms compliance.

And concerning the following request any of our products contains some of it:

Brominated flame retardants (HBCD, TBBPA), Phthalates (DEHP) ,, Lead, Arsenic and medium-chained chlorinated paraffins
