

# **ENVIRONMENTAL PRODUCT DECLARATION**

in accordance with ISO 14025, ISO 21930 and EN 15804

Owner of the declaration: Program operator: Publisher: Declaration number: Registration number:	Saint-Gobain Byggevarer as The Norwegian EPD Foundation The Norwegian EPD Foundation NEPD-1956-864-EN NEPD-1956-864-EN
ECO Platform reference number:	
Issue date:	12.12.2019
Valid to:	12.12.2024

# weberbase KC 50/50

# Saint-Gobain Byggevarer as

#### www.epd-norge.no

### **General information**

#### Product:

weberbase KC 50/50

#### Program operator:

The Norwegian EPD Foundation Pb. 5250 Majorstuen, 0303 Oslo Phone: +47 97722020

#### e-mail: post@epd-norge.no

Declaration number: NEPD-1956-864-EN

ECO Platform reference number:

#### This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A1:2013 serves as core PCR. PCR-PART A: Construction products and services, and PCR-PART B for technical-chemical products in the building and construction industry.

#### Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

#### Declared unit:

1 kg weberbase KC 50/50

Declared unit with option:

A1,A2,A3,A4

Functional unit:

#### Verification:

Independent verification of data, other environmental information and the declaration according to ISO14025:2010, § 8.1.3 and § 8.1.4

External

Third party verifier:

Sign

and Konnig

Senior Research Scientist, Anne Rønning

(Independent verifier approved by EPD Norway)

#### Owner of the declaration:

Saint-Gobain Byggevarer as Contact person: Line Holaker Phone: +47 41 63 50 46 e-mail: info(at)weber-norge.no

#### Manufacturer:

Saint-Gobain Byggevarer as

#### Place of production:

Saint-Gobain Byggevarer - Ski, Norway

#### Management system:

ISO 9001, ISO 14001

#### Organisation no:

940 198 178

Issue date: 12.12.2019

Valid to: 12.12.2024

#### Year of study:

2019

#### Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

#### Author of the Life Cycle Assessment:

The declaration is developed using eEPD v3.0 from LCA.no Approval: Company specific data are:

Collected/registered by: Line Holaker

Internal verification by: Anne Kaiser

#### Approved:

Sign	
Hakon Hauan Hakon Hauan Managing Director of EPD-Norway	

### Product

#### Product description:

weberbase KC 50/50 is a dry mortar based on cement and lime. When mixed with water, it is a ready to use mortar for indoor and outdoor use. weberbase KC 50/50 can be used as render on substrates of concrete, bricks, Leca® and other previously rendered surfaces or mineral based substances. The mortar can be applied as a thin slurry, applied as a base coat on Leca®, bricks and detached Lecawall, and applied as a final coat on concrete, bricks and Leca®. weberbase KC 50/50 can also be used as repair mortar on lime-cement based rendered surfaces and as masonry mortar.

#### **Product specification**

The composition of the product is described in the following table:

Materials	%
Binder	10-30
Aggregate	60-90
Filler	1-10
Additives	<0,1
Packaging	2-3

### LCA: Calculation rules

#### Declared unit:

1 kg weberbase KC 50/50

#### Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

Machines and facilities (capital goods) required for and during production are excluded, as is transportation of employees.

#### Data quality:

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below.

Plant manufacturing data is collected from previous year. Waste data from the process is an average value from the last 5 years.

The calculations are based on production in Ski, and delivery in 25 kg plastic bags. Transportation used in A4 is 30 km.

Materials	Source	Data quality	Year
Chemicals	Chemicals below cut-off	No data	0
Filler	Østfoldforskning	Supplier data	2013
Cement	NEPD-1217-383	EPD	2015
Aggregate	Østfoldforskning	Database	2016
Filler	Østfoldforskning	Supplier specific	2016
Packaging	ecoinvent 3.4	Database	2017
Packaging	Modified ecoinvent 3.4	Database	2017

#### Technical data:

Mortar category: CS II (EN 998-1). Compressive strength 28 days: class CS III Composition: KC 50/50/610. For further information see www.weber-norge.no

#### Market:

Norway

#### Reference service life, product

The reference service life of the product is similar to the service life of the building.

The allocation is made in accordance with the provisions of EN 15804.

Incoming energy and water and waste production in-house is allocated

equally among all products through mass allocation. Effects of primary

production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the

#### Reference service life, building

material is allocated to this analysis.

60 years

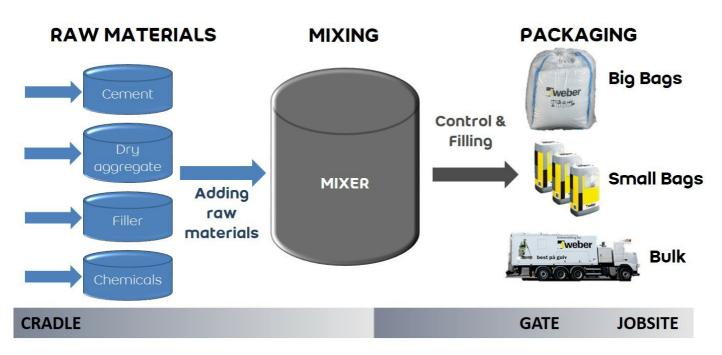

Allocation:

#### System boundary:

All processes from raw material extraction to product transport to the construction site are included in the analysis (A1-A4).

The flow chart below illustrates the system boundaries for the A1 to A3 part of the analysis. Transportation from production plant to Oslo is included in A4.

#### Additional technical information:

2 kg dry mortar gives approximately 1 liter of final product. The remaining powder is classified as hazardous waste. Cured material is inactive and not classified as hazardous waste and may be disposed as construction waste to disposal or recycling. The packaging properly emptied is not classified as hazardous waste.

The LCA calculation has been made taking into account the fact that during the manufacturing process it is used 100% renewable electricity. This 100% renewable electricity bought is evidenced by Guarantee of Origin certificates (GOs), valid for the period chosen in the calculation (2019).

### LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

### Transport from production place to user (A4)

### Additional Norwegian requirements

#### Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Electricity mix	Data source	Amount	Unit
El-mix, Norway (kWh)	ecoinvent 3.4	31,04	g CO2-ekv/kWh

#### Dangerous substances

The product contains no substances given by the REACH Candidate list or the Norwegian priority list. The product is classified as hazardous waste (Avfallsforskriften, Annex III), see table.

Name	CASNo	Amount	
Portland Cement	65997-15-1	5-10%	
Calcium hydroxide	1305-62-0	5-10%	

#### Indoor environment

The product has no impact on the indoor environment.
