Touchless urinal flusher with an infrared sensor. Fixed electrical connection 230 V. When a person enters the recognition range, the infrared sensor reacts and the flushing will start after a preset period. Flow-rate limitation at 0.2 l/s can be removed to increase the flow-rate. The faucet is equipped with a litter filter.

- Offentlige rom, Industri
- Berøringsfri, Separat omformer, Bluetooth®
- Takmontert
- Smussfilter
- Infrarød Sensor, Magnetventil, Omformer inkludert
