To whom it may concern

REACH

Dear Partner,

REACH, the European Community Regulation on **Registration, Evaluation, Authorisation and Restriction of Chemical substances** (EC 1907/2006) entered into force June 1st, 2007. REACH has a significant impact on all parties of the supply chain and requires our close cooperation and communication.

At KNIPEX all inquiries concerning regulations or directives are handled by our product management. Therefore, we kindly ask you to address all inquiries regarding KNIPEX referring to REACH to the signee. From there on the internal communication will be directed.

We are familiar with the REACH recommendations. As a European Manufacturer and suppliers of "articles" for the purpose of REACH we are obliged to announce the use of substances that have to be registered according to Annex XIV of REACH and to label the products that contain such substances accordingly. Furthermore we are obliged to inform our customers conforming to Article 33 REACH if articles supplied by KNIPEX contain more than 0,1% by weight of substances that are found in the valid SVHC list, including the latest amendments.

According to our todays knowledge none of our products and packagings does contain one of these substances and we intend to keep this that way. We can assure you that we would act immediately and inform you accordingly if this situation would change.

Yours sincerely,

KNIPEX - W e r k

i. V.
