

Prepare your systems for winter & stay protected all year round

When temperatures drop, your operations shouldn't slow down. Freezing, overheating, and costly equipment damage can disrupt performance and compliance but you can prevent it.

Mono ethylene glycol marine applications

Protect systems
Freeze & corrosion protection

Improve efficiency
Efficient heat transfer

Ensure reliability
Operational continuity

LNG fuel system
Used in FGSS, vaporizers and heat exchangers to ensure stable LNG operation.

MEG
Essential for cooling, heating and protection onboard and offshore

LNG CARRIER

HVAC systems
Ensures reliable performance of chilled water and HVAC systems across all climatic conditions.

Closed cooling water systems
Provides freeze protection and efficient heat transfer for engines and auxiliary equipment.

OIL / CHEMICAL TANKER

FPSO

Heat exchangers
Enhances heat transfer efficiency and prevents freezing within heat exchange circuits.

Emergency generators
Protects generator cooling systems from freezing, ensuring reliable power at all times.

OIL RIG / OFFSHORE PLATFORM

CRUISE SHIP

Offshore applications
Used in offshore platforms, FPSOs and rigs for cooling, heat transfer and process reliability.

Freeze protection
Prevents freezing of pipelines, equipment and critical systems in low temperature conditions.

Equipment protection
Reduces corrosion, scaling and wear, extending equipment life and reducing maintenance costs

Gas hydrate prevention
Injected into offshore gas systems to prevent hydrate formation and maintain uninterrupted production and pipeline flow.

Product details

Mono Ethylene Glycol (MEG)

Mono Ethylene Glycol (MEG)

Product Number

912021 (IBC)

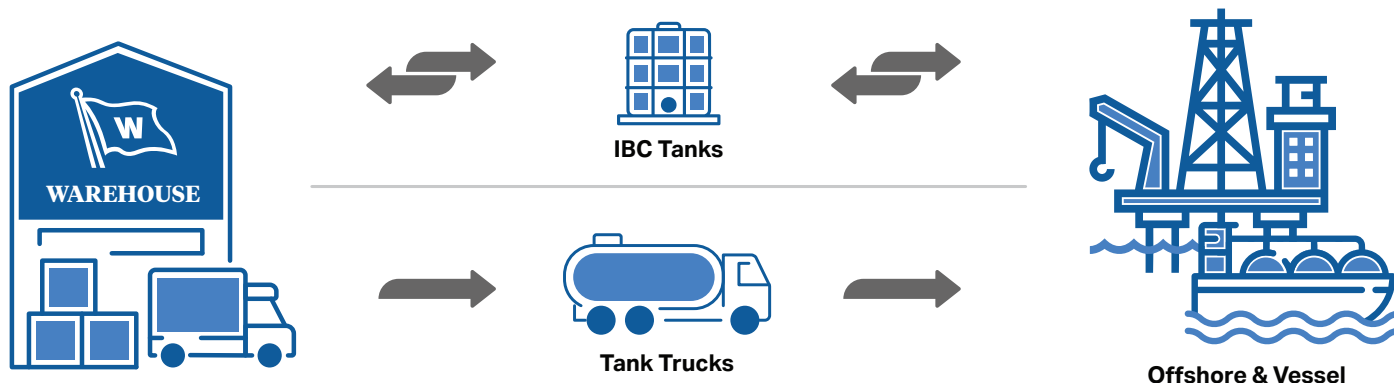

909018 (pail and drum)

Flexible delivery options to bring the product to you

You can select road transport options via IBC tanks or tank trucks, and our experienced team can ensure timely delivery to your vessel's location.

Our service minimises operational disruptions, optimises delivery times, and provides reliable support.

Benefits of partnering with Wilhelmsen Ships Service

Competitive Pricing

Attractive all-inclusive rates with pumping, where possible

Trusted Quality

High-purity MEG meeting industry standards, with controlled water content and consistent product quality

Timely Response

Prompt and proactive support to address your needs

Unparalleled Delivery Experience

Seamless last mile delivery service for peace of mind

Global Reach

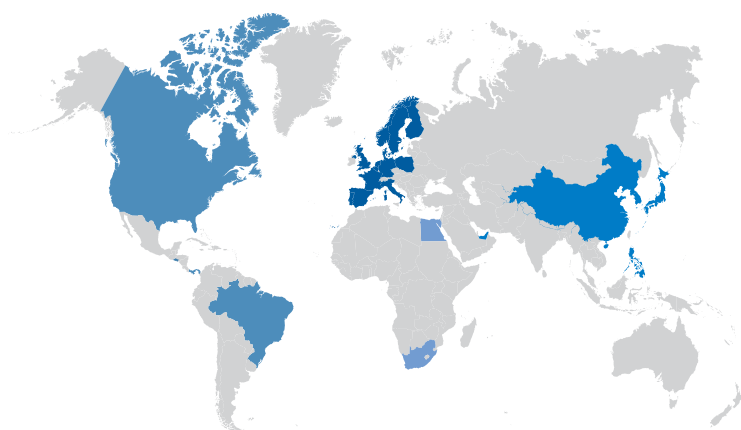

Extensive network for reliable deliveries worldwide

Convenience

One stop shop for all your chemical needs

Delivery capabilities

● The Americas

Brazil
Canada
El Salvador
Panama
USA

● Europe

Belgium
Finland
France
Germany
Gibraltar
Italy
Netherlands
Norway
Portugal
Spain
Sweden
United Kingdom

● Asia

China
Japan
Korea
Philippines
Singapore
UAE

● Africa

Egypt
South Africa

We are continuously adding to our delivery locations. Kindly contact your local WSS customer service for our updated delivery capabilities.
