Infection control for SARS-CoV-2 with Unitor Easyclean Cleaning and Disinfection

Marine professional across the globe are concerned during the outbreak of respiratory illness caused by novel coronavirus, SARS-CoV-2.

Focus on personal and general hygiene, as well as social distancing are recommended as main actions to reduce infections and spreading the virus. Further reduction of possible virus spread by contact with contaminated fomites can be achieved by disinfection of surfaces that could have been contaminated with SARS-CoV-2.

SARS-CoV-2 has been categorized as an enveloped virus, and since “Unitor Easyclean Cleaning and Disinfection” formulation have demonstrated viricidal activity against enveloped viruses, Unitor Easyclean Cleaning and Disinfection can be efficacious against SARS-COV-2 Coronavirus.

For additional information on correct use of Unitor Easyclean Cleaning and Disinfection, please follow directions in the product description.

Sincerely

Øystein Sandvand
Business Development Manager - Marine
